August 2011 - Code-No. 09'11

## **Windmüller & Hölscher to Exhibit at ICE Europe 2011 8 – 10 November in Munich Hall B5, Stand 1028**

Windmüller & Hölscher, the German manufacturer of machinery for the flexible packaging industry, will exhibit at the upcoming International Converting Exhibition ICE 2011 in Munich. W&H is a leader in the industry and distinguishes itself from its competitors with its advanced technology and unrivaled product range. Experts on all W&H product lines, including blown and cast film extrusion, flexographic and gravure printing as well as converting, will be available for consultation and meetings at the company's booth, Hall B5, Stand 1028.

A core segment at W&H is CI flexographic and gravure printing presses for printing on paper, film and laminates. W&H offers competitive and attractive solutions, from entry-level to high-performance machinery. The range of applications can be enhanced by integrating inline systems, which when combined with the proper equipment, can be used for coating and cold seal applications. For high-end laminations of flexible packaging materials, W&H offers cost-effective, solvent-free solutions with the **VARICOATER LF**.

W&H subsidiary, BSW (Bag Solutions Worldwide) in Vienna manufactures the ecoTex as an economical line for coating and laminating woven Polypropylene.

**PR 1252:**

Inline laminating unit on a HELIOSTAR  
gravure press.
